Industrial Grade IG Models User Manuals

When you need a heavy-duty compressor built for demanding environments, the Viair Industrial Grade (IG) compressor range delivers robust, reliable air supply for professional and commercial applications. Designed for systems that use air tanks or reservoirs, IG compressors are ideal for air suspension systems, pneumatic controls, air lockers, air horns and other industrial or specialist vehicle installations where consistent performance and durability are essential.

The Viair IG range includes both 12 V and 24 V models, with popular part numbers such as 00096 (96C IG), 15010 (150C IG 12 V), 15018 (150C IG 24 V), 25050 (250C IG 12 V), 25058 (250C IG 24 V), 33050 (330C IG 12 V), 33058 (330C IG 24 V), 45050 (450C IG 12 V) and 45058 (450C IG 24 V).

In this post, you'll find the official Viair IG Series (Industrial Grade) compressor user manuals, providing clear installation instructions, duty cycle specifications, wiring guidance and operating information — helping you select, install and maintain the right IG compressor with confidence.
